Tourists
Event

Omnivore
7

Skip two turns to think about classification and alternatives to Linnaeus' system.

Linnaeus was the first naturalist to include man within the animal kingdom. His system also provided a scientific foundation for systemic racism, providing justification and legitimization of slavery and the colonies.

Man-Made

Nature reserve NDSM
Action

NDSM gets turned into a nature reserve. Place this card under any other card and it doubles the point value.

All of north historically was swampland.

Concrete
Event

*

Man-Made

Place this card on a photosynthesis card, all surrounding small animals die(below and up to 5).

NDSM is only about one meter above the sea-level. Expectations are that the water may rise up to 1.3m in the year 2100.

Gentrification
Event

Petra's iPhone

Man-Made

Due to construction work, the natural habitat of the ecology is disrupted. Forced move of a SPECIES card.

Construction will go on till at least 2030.

Verdedig Noord
Action

Verdedig Noord is an action group against gentrification of Amsterdam North. This card discards the effects of the Gentrification EVENT card.

Leave the game, pick a piece of plastic litter, trash it and continue the game.

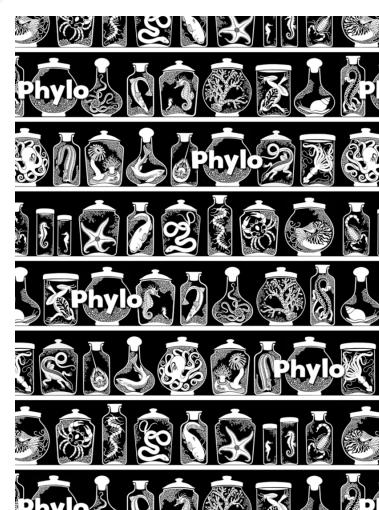

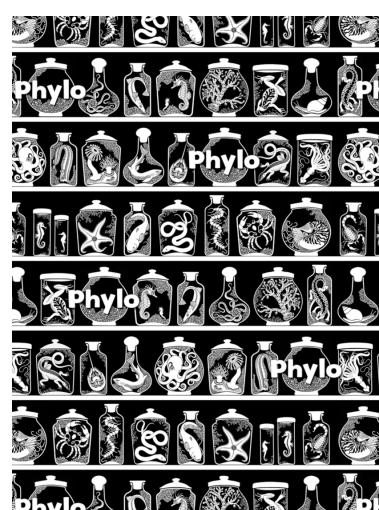

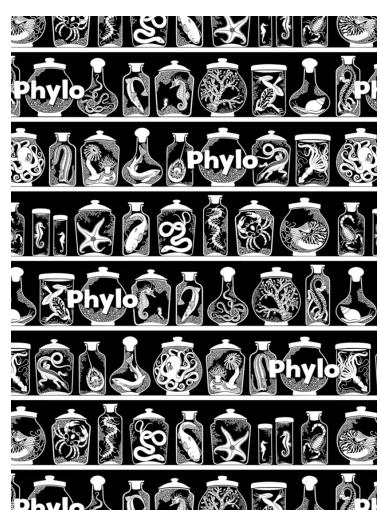

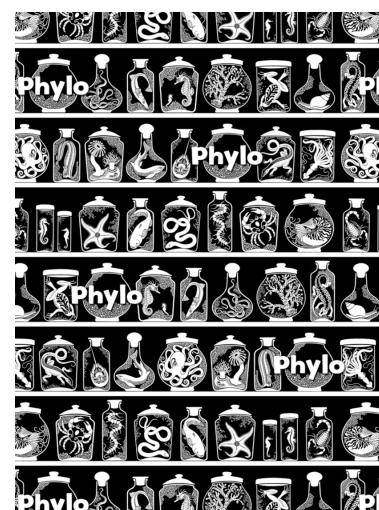

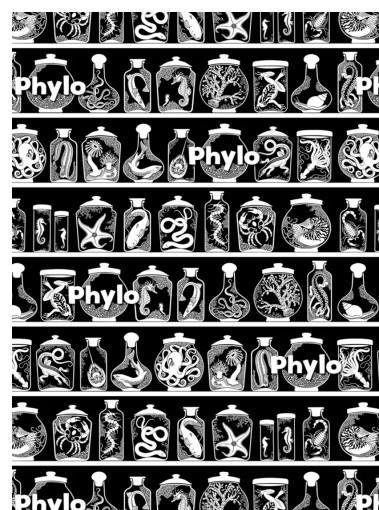

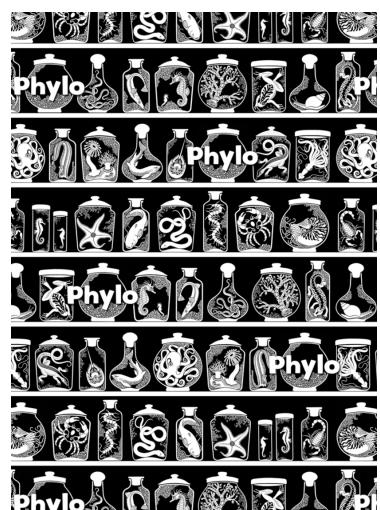

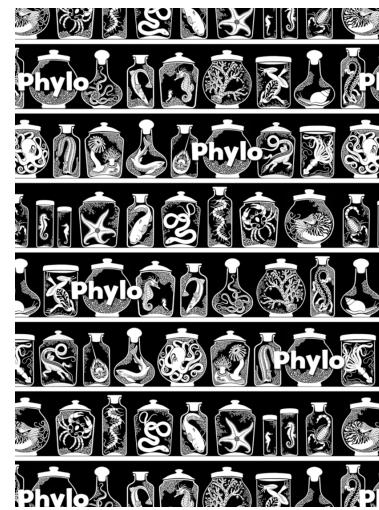

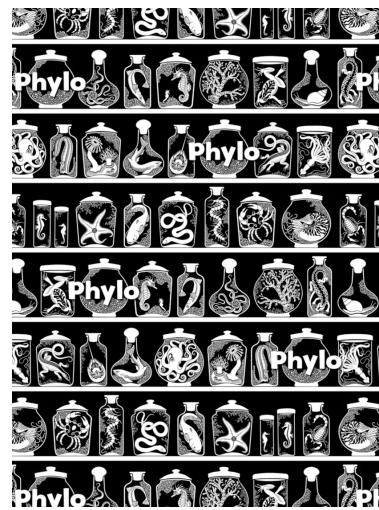

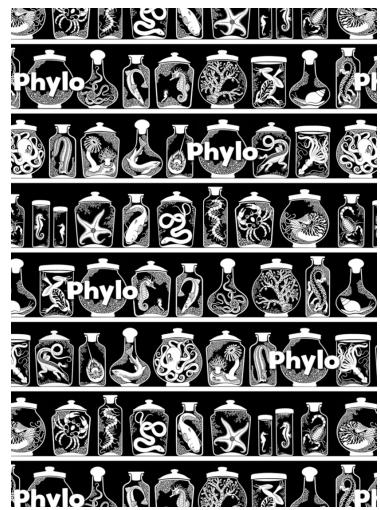

Place this card on the board, place a 1 future event card on top of it to eliminate it.

Microplastics are spread in every corner of the globe, from Mount Everest, the highest peak, to the Mariana Trench, the deepest trough.

Strange sounds from Beyond - Festivals
Event

Eefrow Festival, 2018, Eefinck Schattenkerk

Man-Made

Due to noise pollution and increased amount of people visiting the terrain, SPECIES are temporarily disrupted. For one round, this card cancels out one SPECIES card.

Radical Greening
Action

Petra's iPhone

Tourism
Event

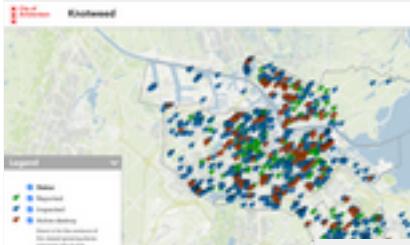

Petra's iPhone

Man-Made

Environmental impacts of tourism includes soil erosion, pollution and disruption of the natural habitat of SPECIES. This card has a negative effect on a SPECIES card.

With world-class museums, quirky festivals, theatre, live music, laid-back bars and delightful restaurants, there's never a shortage of things to do in Amsterdam!

Japanese Knotweed Plague
Event

Source: Gemeente Amsterdam

Natural

Japanese Knotweed is uncontrollably spreading through the city, including Noord. Its roots go right through concrete, quay walls and streets. This card destroys one PHOTOSYNTHETIC SPECIES card.

It is listed by the World Conservation Union as one of the world's worst invasive species.

Pest Control
Action

insightpest @ creativecommons.org

Flood
Event

chave weather - daily videos (youtube)

Man-Made

Water flooding in from failing water management systems due to heavy storms at unexpected times of the year (because of extreme climate change) causes all organisms to be wiped off the board except photosynthesizers with a scale larger than 5 (for example bushes or trees).

Insurance won't reimburse costs for any damage caused

Ferry failure
Event

www

Man-Made

The ramp of the ferry doesn't work anymore.

PLAY: place this card on any Omnivore or Special species.

EFFECT: you cannot enter into the ecosystem from the other side of the city anymore. The species is immediately discarded and has to wait on the ferry until an action card saves them

All Climates

Flood
Event

Natural

PLAY: Place this card on any SPECIES card that lives at Terrains where it could potentially be flooded.

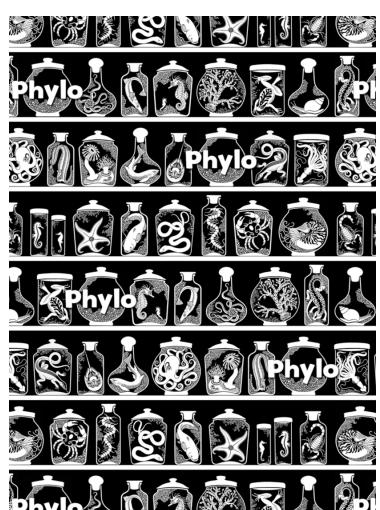

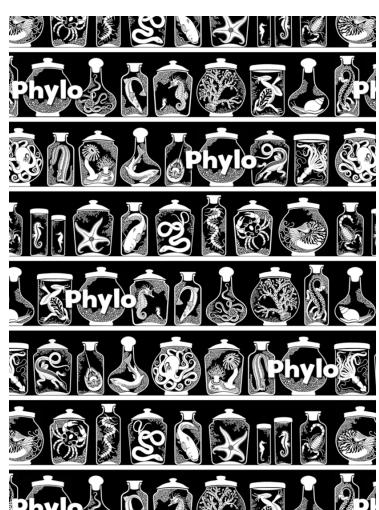

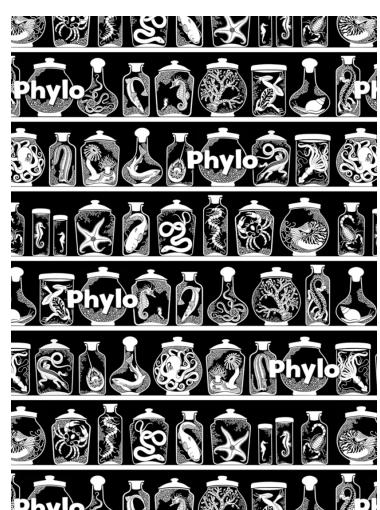

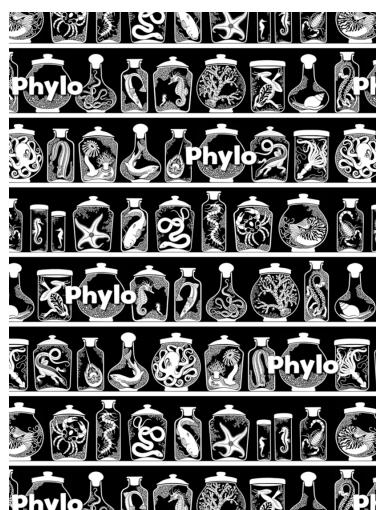

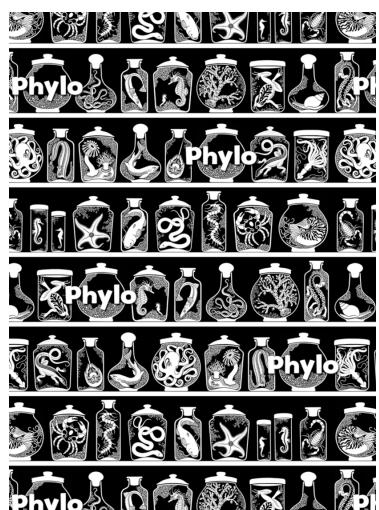

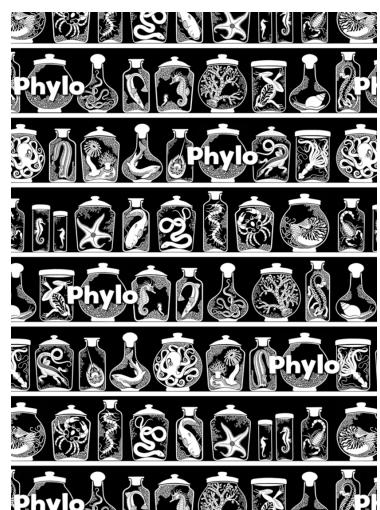

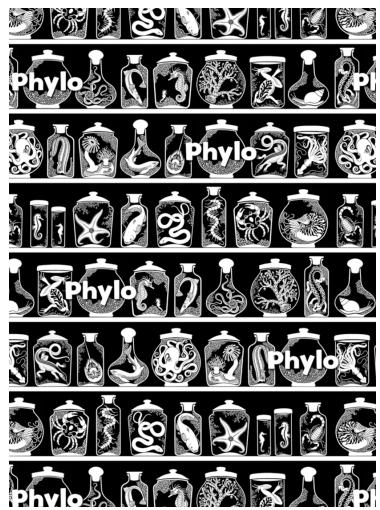

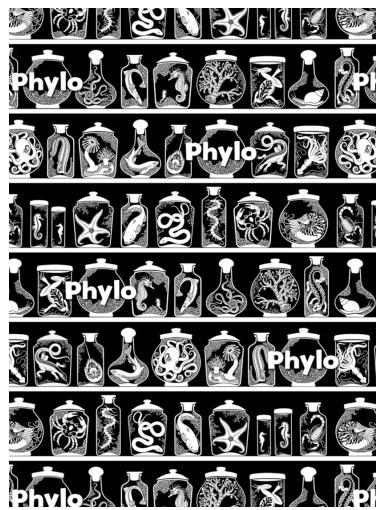

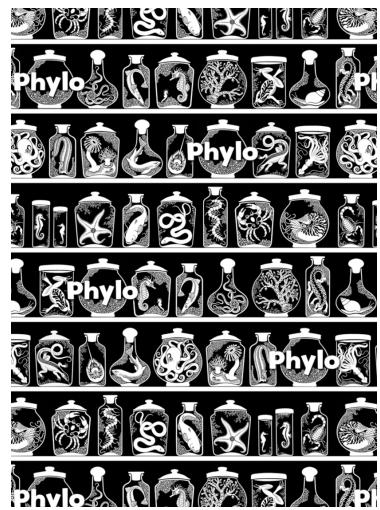

EFFECTS: The SPECIES card, as well as one chosen adjacent card are immediately discarded.

Invasive species
Event

PLAY: Place this card on any SPECIES card.

EFFECT: The SPECIES card is influenced by some other invasive SPECIES and has to be discarded.

Construction
Event

Sandy Richter

Man-Made

It destroys species completely and can even cause extinction. When this card is played, it can destroy species immediately within the zone, so it destroys the nearest 5 species/ cards.

Linnaeus classification system
Event

*

**Man-Made**

Skip two turns to think about classification and alternatives to Linnaeus' system.

Linnaeus was the first naturalist to include man within the animal kingdom. His system also provided a scientific foundation for systemic racism, providing justification and legitimization of slavery and the colonies.

Herbivore
5 **Crayfish invasion**
Event

All small water herbivores die. Place this card on a water animal it loses all points. Surrounding cards lose half their value.

Crayfish larvae get transported by the ballast water of containerships. The species has no natural enemies and destroys the dikes and eat the native water-plants.

**Cool** **Cold** **Warm****Tourists**
Event**7** **Man-Made**

Place this card on an avian card and this card will lose half its point value. Also, go take a picture of a tourist. The other players continue playing while you are gone.

You can recognize the tourists by the rattling sound of their trolley case. They walk around photographing the scenery, spreading invasive species and leaving a trail of trash and pollution.

Rising sealevels
Event**5****Man-Made**

Place this card on a photosynthesis card, all surrounding small animals die(below and up to 5).

NDSM is only about one meter above the sea-level. Expectations are that the water may rise up to 1.3m in the year 2100.

Nature reserve NDSM
Action

NDSM gets turned into a nature reserve. Place this card under any other card and it doubles the point value.

All of north historically was swampland.

All Terrains**Concrete**
Event

*

**Man-Made**

Concrete destroys natural infrastructure without replacing the ecological functions that humanity depends on for fertilization, pollination, flood control, oxygen production and water purification. Place this card on a plant -> any card around it will die.

Concrete outweighs the combined carbon mass of every tree, bush and shrub on the planet.

All Terrains**Clean environment**
Action
